Subject: Microsoft Settlement

This country needs to get this case settled. It has hurt the economy. The only people interested in harming Microsoft are its competitors. The everyday users of Microsoft products are more than happy with the products and the price you pay for them. This suit caused me, a 76 year old retired small business man, to lose many dollars in my IRA from losses, not only in Microsoft stock, but many other stocks. The action against Microsoft precipitated the stock market crash and the recession the country is now in.
